Mobile: +91 6281971518

PROFILE

AI-focused Computer Science undergraduate with experience building RAG pipelines, AI agents, and scalable back-end systems using FastAPI, LangChain, vector databases, and LLM integrations. Skilled in deploying production-style applications using Docker, AWS, and CI/CD workflows.

EDUCATION

Dayananda Sagar University

Bachelor of Technology - Computer Science and Technology; GPA: 8.75

Bangalore, India

September 2023 - Present

SKILLS SUMMARY

- **Languages:** Python, SQL, JavaScript, TypeScript, Java, C
- **Backend & APIs:** FastAPI, Flask, REST APIs, Node.js, Async Python
- **Vector & Databases:** FAISS, ChromaDB, Neo4j, MongoDB, MySQL, SQLite
- **AI/ML:** LangChain, LangGraph, LlamaIndex, RAG Pipelines, AI Agents, Prompt Engineering, OpenAI API, Gemini API, HuggingFace Transformers, Ollama, Embeddings, Semantic Search
- **DevOps & Deployment:** Docker, Jenkins, AWS EC2, GitHub Actions, Nginx, CI/CD
- **Tools:** Power BI, Excel, Git, GitHub, Postman, Linux
- **Soft Skills:** Problem solving Report Building, People Management, Excellent communication, Adaptability

PROJECTS

Secure Offline RAG System | Python/FastAPI · Neo4j · FAISS · Three.js | [LINK](#)

- Built an offline AI document intelligence system using FAISS vector search and Neo4j knowledge graph retrieval to reduce hallucinations.
- Integrated local LLMs (Llama 3.2, Mistral) with Ollama and HuggingFace embeddings for secure AI inference.
- Engineered role-based access control, audit logging, and semantic document search workflows using FastAPI and SQLite.
- Implemented Neo4j knowledge graph-based document relationship mapping to improve contextual AI retrieval and semantic search.

RunaGen-AI | Python · FastAPI · LangChain · Gemini AI · RAG | [LINK](#)

- Built an AI-powered career assistant platform leveraging Gemini AI, RAG pipelines, and semantic search workflows.
- Developed AI-driven mentorship, career guidance, and personalized recommendation systems.
- Engineered FastAPI backend services and LangChain-based AI orchestration pipelines.
- Implemented scalable AI interaction workflows with real-time response generation and modern responsive UI.

DineInGo | React · Node.js · Firebase · TypeScript | [LINK](#)

- Built a restaurant and event reservation platform with multilingual support and responsive UI/UX.
- Developed REST APIs, Firebase authentication, digital PDF invoicing, and Apple/Google Wallet pass integration.
- Implemented smart search, location-aware recommendations, and real-time booking workflows.
- Designed scalable frontend and backend architecture for seamless customer reservation experiences.

FlowGrid – ERP System | React · Node.js · MongoDB · Docker · Jenkins · AWS EC2 | [LINK](#)

- Built and deployed a full-stack ERP platform with analytics dashboards, employee management, and JWT authentication.
- Automated CI/CD deployment workflows using Jenkins, GitHub Actions, Docker, and AWS EC2.

CERTIFICATES

- **Nasa Space Apps Challenge - 2025** | [LINK](#)
- **AWS Academy Graduate - Cloud Foundations** | [LINK](#)

LEADERSHIP AND ENGAGEMENTS

- Managed and successfully executed two large-scale annual college fests and one major cultural festival as an Event Manager for the Cultural and Performing Arts (CPA) club.
